

Under Sink Chiller

A professional appliance that supplies large quantities of cold water on demand. The main compressor unit, shown in the picture on the right is extremely quiet and easily fits into a base cupboard.

The chillers small format requires very little space. This under-counter model fits in easily beneath the bar, counter or the sink.

In addition to its small footprint, the cooler is technically capable, dispensing 5 ltr/h of chilled water. Safety and hygiene are guaranteed by the stainless steel cold tank connected directly to the water supply. The compressor is also fitted with an overload protector to ensure it is not affected by power variations.

A water filter can be fitted to this chiller to ensure the purity of the water that you will be drinking.

On the top of the counter we supply a variety of goose neck taps for dispensing the water.

Capacity

Throughput per hour : 5 litres per hour (cold)

Power supply

230 Volt, 50Hz. 3 pin plug and 200 cm power cord.
